

# A **Big Object Trap**, made with a wire, works best.

Thicker materials stop the flow of water being created by your dropping,  
And the trap will flip back into the toilet orifice, then being plugged.

Take a  
**COATED**  
"Standard  
Wire  
Hanger"

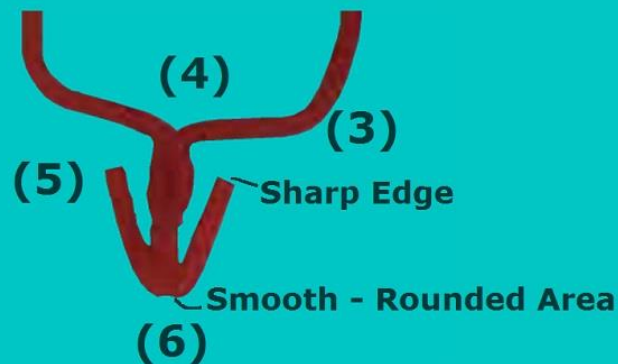

**Red or White  
Coating is Good,**  
being easy  
to clean.

"Two" **FLAT NOSED**  
Pliers are needed  
to make bends.

**SIDE  
VIEW**

**DOWN  
VIEW**

## BENDING EACH OF TWO SIDES!

Bend (1) 90° down.

Bend (2) 85° up and forward.

Bend (3) 90° towards center.

Bend (4) 90° forward.

Bend (5) Twist the two sides together.

Bend (6) Roll each wire back on it's self  
and cut excess wire off.

The trap should stand up in the bottom of the toilet  
with original Hanger Hook leaning back and above  
the water exit. The twists you made should be  
flat on the bottom of toilet.

GOOD LUCK!
